CHIN-HSIEN SUPPLY DEPOT PAN-LA-SHAN NW, CHINA

A previously identified storage facility is located at 39-11-50N 121-46-40E, 5 nautical miles (nm) northeast of Chin-hsien and 0.7 nm northwest of the village of Pan-la-shan, China (Figure 1). Early aerial photographic coverage of the area has established the construction date as sometime between [REDACTED]

Storage

Facilities in the storage area include 7 gable-roofed storage buildings of various sizes, 1 administration/support building, 2 open-storage areas (Figure 3) and 2 small support buildings. Each of the 4 long storage buildings (Buildings 1-4, Figure 4) is divided into 3 equal sections by what appear to be firewalls. Separate entrances for each section are located along the southeast side of the buildings. The most northeasterly section of Building 2 has been constructed at a lower level, giving the roof a stepped appearance. The 6 dormer ventilators which were seen on the roofs of each of these buildings through [REDACTED] are no longer visible on photography of [REDACTED] (Figure 3). The roofs of two of the buildings appeared to be undergoing a refurbishing on the [REDACTED] photography.

Two of the remaining storage buildings (Buildings 6 and 7, Figure 4) have 4 dormer-type roof ventilators. These 2 buildings are approximately 2 stories high, and they appear to have end walls of heavy construction.

The other storage building (Building 5, Figure 4), which is of standard construction, has no special ventilation devices.

Unidentified objects are visible in the 2 open-storage areas (Figure 3).

Security

Perimeter security for the storage area is provided by a triple fence. The fence has been moved since [REDACTED] to include more area in the northwest and southwest portions of the site (Figures 3 and 4). A single fence now occupies the former triple fenceline along these 2 sides. A guardhouse is located at the east entrance to the storage area.

Housing and Administration

The housing and administration area is located northeast and southeast of the storage area. Included among the facilities in this area are 1 administration building, 1 barracks building, 1 vehicle shed, an athletic field, animal pens (Figure 3), 1 small open-sided shed, and 6 unidentified support buildings.
